

Fulvic Acid

GUARANTEED ANALYSIS

Nitrogen **0.30%**

Potash (K₂O) **1.25%**

Vegetable origin

Guaranteed through International Method in USA authorized laboratories.

Fulvic Acid is a concentrate in powder. It helps in the uptake of micronutrients of the plants. It is 100 % soluble. Can be used in fertilizer solutions or pesticide sprays.

It is compatible with most liquid fertilizers, pesticides, herbicides and defoliant. However, if the desired combination has not been previously used, a compatible test is recommended.

KEEP OUT OF REACH OF CHILDREN

General Application

Landscape and/or gulf turf: Apply 224 gm/ha in spring and fall.

Irrigate to the soil when mixing with pesticides. Add pesticides to the mixing tank after adding the **Fulvic Acid**.

For foliar application: use 2.2 to 3.4 kg/ha in at least 19 l of water. Finish with spray for aerial equipment when plants are 3 to 4 weeks old. Repeat every 15 to 20 days during the cycle.

**Net content 20 kg
Made in USA**

Product suitable in organic farming according to EC 834/2007 and NOP Regulation.
