

Soil Enhancer

GUARANTEED ANALYSIS

Over 4 billion colony forming units (CFU) per 2.5 gallons. (1.67×10^9 CFU/gallon) of: *Bacillus laterosporus*, *Bacillus coagulans*, *Bacillus firmus*, *Bacillus chitinosporus*, *Bacillus megaterium*, *Paenibacillus durus*, and *Paenibacillus macerans*: 6.3×10^4 CFU/ml each.
0.53 million total propagules per 2.5 gallons (2.12×10^5 total propagules/gallon) of: *Glomus aggregatum*, *Glomus intraradices*, *Glomus mosseae*, and *Glomus tunicatum*: 1.4×10^1 propagules/ml each

Total Other Ingredients / Inert Ingredients: Water 98.300% Citric acid 0.015%

Soil Enhancer is a potent liquid blend of *Bacillus* bacteria and Mycorrhizal fungi, transforming the plant rhizosphere into a thriving hub for meristem growth. This innovative solution fosters soil biodiversity, amplifying organic mineralization and nutrient uptake, resulting in robust plant health and vitality.

General Application:

Shake thoroughly to ensure uniformity before use. For optimal preservation, store in a cool, dry location away from direct sunlight, and always seal the lid tightly when not in use to prevent any moisture or contamination.

Ferti-Soil can be mixed with other liquid fertilizers and soil conditioners. Can be applied with various methods including spray equipment, hose-end sprinklers and other fertigation equipment. Be sure to calibrate your application equipment accurately to guarantee precise and effective distribution of Ferti-Soil and other additives.

Rate recommendations for tank mixtures:

1-2 pints per acre on initial application and then every 3 weeks until harvest at a rate of 2 pint per acre. For turf applications - 0.40 fluid oz of Ferti-Soil per 1000 sq/ft
